Does Java support goto?

Unlike C/C++, Java does not have *goto* statement, but java supports label. The only place where a label is useful in Java is right before nested loop statements. We can specify label name with break to break out a specific outer loop. Similarly, label name can be specified with continue.

See following program for example.

```
public class Main {
  public static void main(String[] args) {
    outer:
    for (int i = 0; i < 10; i++) {
      for (int j = 0; j < 10; j++) {
        if (j == 1)
          break outer;
        System.out.println(" value of j = " + j);
      }
    }
  }
}
```

Run on IDE

Output:
value of j = 0
